VOLUME 41 1987

SUBJECT INDEX

Adrenal modulation, 519
  neonatal gonadectomy
  parental behavior
Adrenalectomy, 391
  brain growth
  corticosterone treatment
α_2-Adrenoceptors, 7
  mating behavior
  sexual behavior, male rat
α_2-Adrenoceptor antagonists, 15
  ejaculation
  erectile reflexes
  sexual behavior, male rat
Age differences
  conspecific chemical signals, 445
  guinea pigs, male, 445
  human studies, males, 627
  locomotor activity, 627
  neonatal vomeronasal organ removal, 445
  sleep duration, 627
Age-related memory deficits, 503
  glucose ingestion
  human studies, elderly
  memory enhancement
Aggressive behavior
  agonistic behavior, 397
  benzodiazepines, 265
  chlordiazepoxide, 265
  diabetes mellitus, 397
  glycemic responses, 397
  intrauterine position, 639
  modulatory actions, 265
  plasma glucose levels, 397
  receptor ligands, 265
  sexual behavior, mice, 639
  social preference, 639
Aggressive behavior, male, 99
  lesions, electrolytic
  lesions, medial amygdala
  social learning
Aging, 1
  hamsters
  hormonal responses
  submaximal exercise
  substrate depletion
Agonistic behavior, 397
  aggressive behavior
  diabetes mellitus
  glycemic responses
  plasma glucose levels
Alkalosis, 357
  animal models
  EDTA
  hypocalcemia
  panic
  sodium lactate
Altered thyrodal states, 119
  ambiental stimuli
  hypothroidal rats
  low iodine diet
  open field
Ambiental stimuli, 119
  altered thyroidal states
  hypothyroidal rats
  low iodine diet
  open field
Amphetamine, 179
  muramyl peptide
  physostigmine
  rabbits
  slow wave sleep
α-Amylase secretion, 209
  human studies
  oral stimulation
  salivary flow rate
Analgesia
  benzodiazepine receptors, 279
  blood pressure, 609
  heart rate, 609
  social defeat, 279
  vaginocervical probing, 609
Animal hypnosis, 331
  micturition
  neurogenic bladder
  rabbits
  spinal cord transection
Animal models
  alkalosis, 357
  benzodiazepine receptors, 247
  β-carbolines, 247
  drinking, 291
  eating, 291
  EDTA, 357
  hypocalcemia, 357
  ingestional behavior, 247
  learned food aversion, 291
  panic, 357
  partial agonists, 247
  protein deficient diet, 291
  pyrazoloquinolines, 247
  rats, pregnant, 291
  sodium lactate, 357
Anionic concentration, 605
  drinking
  ICV chloride infusion
Apparatus
  carbon fiber implantation assembly, 227
  distension control device, 635
  patient activity monitors, 627
  pneumotachograph, 59
Area postrema, 21
  circumventricular organs
  dose-dependent effects
  food intake
  lesions, area postrema
  monosodium glutamate
  systemic injection
Attention, 415
  gerbils
  habituation
  odor preference

Behavioral effects
  developmental effects, 163
  memory, spatial, 163
  noradrenaline depletion, 163
  psychological effects, 427
  subcutaneous pellet implantation, 427
  testosterone, 427
Benzodiazepine receptors
  analgesia, 279
  animal model, 247
  β-carbolines, 247
  ingestional behavior, 247
  partial agonists, 247
  pyrazoloquinolines, 247
  social defeat, 279
Benzodiazepines
  aggressive behavior, 265
  chlordiazepoxide, 265
  delayed response task, 257
  discrimination disruption, 257
  modulatory actions, 265
  punishment resistance, 257
  receptor ligands, 265
Bilateral sectioning, 495
  chorda tympani
  greater superficial petrosal
  sweet taste
Blood brain barrier, 71
  chlorpheniramine
  dietary-induced thiamine deficiency
  muricidal suppression
Blood glucose, 459
  conditioned taste aversion
  sweet taste perception
Blood pressure, 609
  analgesia
  heart rate
  vaginocervical probing
Body weight, 505
  drinking
  eating
  intracerebroventricular infusion
  running wheel activity
  satietin
Brain
  amygdala, 163, 257
  area postrema, 21
  caudal hindbrain, 21
  central grey, 595
  cerebellum, 115, 163
  cerebral neocortex, 525
  cortex, 187
  forebrain, 613
  hindbrain, 459
  hippocampus, 187, 487
  hypothalamus, 163, 371, 465, 595
  locus coeruleus, 187
  medial amygdala, 99
  medial forebrain bundle, 379, 585
  medial frontal cortex, 387
  medial hypothalamus, 549
  medial preoptic area, 439
  mediobasal hypothalamus, 341
  midbrain, 179
  nervus terminalis, 613
  nucleus accumbens, 227
  nucleus raphius, 187

occipital cortex, 163
parafascicular area of the thalamus, 103
parietal cortex, 163, 341
periaqueductal gray, 379
pituitary, 613
posterior thalamic area, 103
prefrontal cortex, 379
preoptic region, 341
retinohypothalamic pathway, 135
striatum, 187
suprachiasmatic nucleus, 135
thalamus, 163
ventral tegmental area, 227, 379
ventrobasal thalamic area, 103
Brain growth, 391
adrenalectomy
corticosterone treatment
Brain monoamines, 563
locomotor activity
sexual refractoriness
Brain stimulation, 595
reward saturation
reward summation
Bromocriptine, 515
pregnancy block
pseudopregnancy
stud males
Bromopride, 433
dopaminergic supersensitivity
long-term treatment
open-field behavior
Bulimia, 621
fat content
human studies
sweetness intensity
taste preference

Caffeine, 25
human studies
impulsivity
memory
sex differences
word lists
Caloric deposition, 129
energy metabolism
environmental conditioning
metabolic conditioning
β-Carbolines, 247
animal model
benzodiazepine receptors
ingestional behavior
partial agonists
pyrazoloquinolines
Carbon fiber implantation assembly, 227
dopamine neurons
freely moving rats
in vivo voltammetry
tail-pinch
Cerebral neocortex, 525
functional heterogeneity
immune system
Cerebrospinal fluid collection, 523
intraventricular cannula
Chlordiazepoxide
aggressive behavior, 265
benzodiazepines, 265
feeding behavior, 539
food-deprivation, 539
modulatory actions, 265
receptor ligands, 265
saccharin-flavored food, 539
Chlorpheniramine, 71
blood brain barrier
dietary-induced thiamine deficiency
muricidal suppression
Cholecystokinin, 125
conditioned taste avoidance
proglumide
Chorda tympani, 495
bilateral sectioning
greater superficial petrosal
sweet taste
Circadian rhythm
eating, 465
Met-enkephalin, 465
entrainment, 219
food intake, 135
human studies, 141
hypothalamus, 465
intermeal interval, 141
meal size, 141, 219
nutrient content, 219
rotated light-dark schedules, 361
sparrows, 361
time isolation, 141
wheel-running, 219
Circumventricular organs, 21
area postrema
dose-dependent effects
food intake
lesions, area postrema
monosodium glutamate
systemic injection
Competitive behavior, 549
lesions, medial hypothalamic
water sharing
Conditioned stimulus, 315
conditioned taste aversion
taste intensity discrimination
Conditioned taste aversion
blood glucose, 459
conditioned stimulus, 315
drinking, 511
eating, 511
satietin, 511
taste intensity discrimination, 315
sweet taste perception, 459
Conditioned taste avoidance, 125
cholecystokinin
proglumide
Conditioned taste preference, 481
diabetic rats
fuel oxidation
Conspecific chemical signals, 445
age differences
guinea pigs, male
neonatal vomeronasal organ removal
Copulation, 53
deer mice
pregnancy imitation
sperm competition
sperm transport disruption
Corticosterone treatment, 391
adrenalectomy
brain growth
Corticotrophin releasing factor, 171
β-endorphin
food intake
immunization
weight gain
Current threshold, 379
intracranial self-stimulation
post-reinforcement pause

Dark adaptation, 193
diurnal rhythms
human studies
luminance sensitivity
Deer mice, 53
copulation
pregnancy initiation
sperm competition
sperm transport disruption
Delayed response task, 257
benzodiazepines
discrimination disruption
punishment resistance
Delta activity, 409
hen, domestic
sleep
Developmental delays, 309
lactation
malnutrition
motor development
zinc deficiency
Developmental effects, 163
behavioral effects
memory, spatial
noradrenaline depletion
Diabetes mellitus, 397
aggressive behavior
agonistic behavior
glycemic responses
plasma glucose levels
Diabetic rats, 481
conditioned taste preference
fuel oxidation
Diet texture, 149
moisture
obesity
starch type
Dietary choice, 451
high protein diet
protein type
Dietary-induced thiamine deficiency, 71
blood brain barrier
chlorpheniramine
muricidal suppression
Differential early rearing, 79
hyperphagia
thermoregulation
Directly stimulated neurons, 371
inferred refractory period
lateral hypothalamic analgesia
paired-pulse stimulation technique
pimozide antagonism
Discrimination disruption, 257
benzodiazepines
delayed response task
punishment resistance
Distension control device, 635
hollow organ sensation
visceral nociception
Drinking
animal models, 291
anionic concentration, 605
body weight, 505
conditioned taste aversion, 511
ICV chloride infusion, 605
intracerebroventricular infusion, 505
learned food aversion, 391
protein deficient diet, 291
rats, pregnant, 291

running wheel activity, 505
satietin, 505, 511
DRL performance, 387
lesions, medial frontal cortex
medial frontal cortex
Drug
amphetamine, 179
bromocriptine, 515
bromopride, 433
caffeine, 25
captotril, 155
carbidopa, 47
CGS 8216, 241, 257, 279

high protein diet, 451
hypothalamus, 465
intracerebroventricular infusion, 505
learned food aversion, 291
protein deficient diet, 291
protein type, 451
rats, pregnant, 291
running wheel activity, 505
satietin, 505, 511
satiety, 31
supraphysiological plasma levels, 31
EDTA, 357
alkalosis
animal models
hypocalcemia
panic
sodium lactate
Ejaculation, 15
alpha$_1$-adrenoceptor antagonists
erectile reflexes
sexual behavior, male rat
Electrode placement, 303
multiple operants
response functions
self-stimulation
train duration
Electromotor command system, 201
electrosensory feedback
fish
flaxedil
rhythmicity
Electrosensory feedback, 201
electromotor command system
fish
flaxedil
rhythmicity
Endogenous angiotensin II, 155
pigeons
salt appetite
sodium depletion
β-Endorphin, 171
corticotrophin releasing factor
food intake
immunization
weight gain
Energy metabolism, 129
caloric deposition
environmental conditioning
metabolic conditioning
Met-Enkephalin, 465
circadian rhythm
eating
hypothalamus

Entrainment, 219
circadian rhythm
meal size
nutrient content
wheel-running
Environmental conditioning, 129
caloric deposition
energy metabolism
metabolic conditioning
Erectile reflexes, 15
alpha$_1$-adrenoceptor antagonists
ejaculation
sexual behavior, male rat
Estradiol, 571
homo/heterosexual partner preference
rats, ovariectomized female
testosterone
Estrous cycles, 471
exercise
fertility
lordosis
steroid levels
Exercise, 471
estrous cycles
fertility
lordosis
steroid levels
Experimental hemianopia, 297
monkeys, cynomolgus
pattern visual evoked potentials
Exploratory behavior, 115
motor activity
selective breeding

Fat content, 621
bulimia
human studies
sweetness intensity
taste preference
Feeding behavior, 539
chlordiazepoxide
food deprivation
saccharin-flavored food
Fertility, 471
estrous cycles
exercise
lordosis
steroid levels
Fish, 201
electromotor command system
electrosensory feedback
flaxedil
rhythmicity
Flash evoked potentials, 327
neuronal activity
rat visual system
urethane
Flaxedil, 201
electromotor command system

fish
rhythmicity
Food-deprivation, 539
chlordiazepoxide
feeding behavior
saccharin-flavored food
Food intake
area postrema, 21
circadian rhythm, 135
circumventricular organs, 21
corticotrophin releasing factor, 171

dose-dependent effects, 21
β-endorphin, 171
immunization, 171
lesions, area postrema, 21
monosodium glutamate, 21
systemic injection, 21
weight gain, 171
Forearm carbon dioxide production, 347
human studies
hypometabolism
respiratory quotient
transcendental meditation
Freely moving rats, 227
carbon fiber implantation assembly
dopamine neurons
in vivo voltammetry
tail-pinch
Fuel oxidation, 481
conditioned taste preference
diabetic rats
Functional heterogeneity, 525
cerebral neocortex
immune system modulation

Genital grooming, postcopulatory, 321
rats, males
venereal disease
Genital reflexes, 439
lesions, medial preoptic area
lesions, midthoracic spinal cord
medial preoptic area
midthoracic spinal cord
noncopulators
spontaneous seminal emission
Gerbils
attention, 415
diurnal rhythyms, 543
habituation, 415
odor preference, 415
scent marking, 543
serum testosterone, 543
Glucagon, 31
eating
satiety
supraphysiological plasma levels
Glucose-ingestion, 503
age-related memory deficits
human studies, elderly
memory enhancement
Glycemic responses, 397
aggressive behavior
agonistic behavior
diabetes mellitus
plasma glucose levels
Gonadectomy, 93
hypophysectomy
maternal responsiveness
pituitary hormonal influence
puberty
Greater superficial petrosol, 495
bilateral sectioning
chorda tympani
sweet taste
Group-living, 37
monkeys
physiological changes
puberty
Guinea pigs, male, 445
age differences
conspecific chemical signals
neonatal vomeronasal organ removal

Habituation, 415
attention
gerbils
odor preference
Hamsters, 1
aging
hormonal responses
submaximal exercise
substrate depletion
Head twitch, mice, 47
5-HT levels
maturation
Heart rate, 609
analgesia
blood pressure
vaginocervical probing
Hen, domestic, 409
delta activity
sleep
High protein diet, 451
dietary choice
protein type
Hollow organ sensation, 635
distension control device
visceral nociception
Home nest preference, 613
LHRH antiserum
nervus terminalis central roots transection
olfactory performance
passive immunization
rats, fetal
Homo/heterosexual partner preference, 571
estradiol
rats, ovariectomized female
testosterone
Hormonal responses, 1
aging
hamsters
submaximal exercise
substrate depletion
Hormone
dihydrotestosterone, 405
estradiol, 405, 571
glucagon, 31
methyltrienolone, 405
testosterone, 405, 427, 571
5-HT levels, 47
head twitch, mice
maturation
Human studies
alpha-amylase secretion, 209
